

SAFETY PRECAUTIONS

For your initial riding practice, select a safe area, free of obstacles with an even surface of dirt, sand, snow, etc. Avoid paved surfaces, as they make learning to maneuver more difficult and will also significantly shorten the tire life.

The clothing most suitable for comfort and protection varies with factors of climate and hazards of the terrain to be traveled. This matter is therefore left to the discretion of the individual rider. In all circumstances, however, we recommend wearing a safety helmet and boots which rise at least above the ankles.

Never put your feet on the ground when the ATC is moving.

Shift the transmission into neutral before starting the engine. Allow sufficient warm up time before proceeding. Ride with your feet on the foot pegs at all times. Under normal riding conditions, it is neither necessary nor desirable to touch the ground for balance.

WARNING IF YOUR FEET ARE REMOVED FROM THE FOOT PEGS TO TOUCH THE GROUND WHILE THE ATC IS IN MOTION, THEY MAY COME IN CONTACT WITH THE REAR WHEELS.

Always keep your feet on the foot pegs.
