

⚠ WARNING

- * Do not downshift when traveling at a speed that would force the engine to overrev in the next lower gear; the rear wheel may lose traction, resulting in a possible loss of vehicle control.

CAUTION:

- * Do not shift gears without disengaging the clutch and closing the throttle. The engine and drive train could be damaged by over-speed and shock.
- * Do not tow the motorcycle or coast for long distances while the engine is off. The transmission will not be properly lubricated and damage may result.
- * Do not ride over a curb or rub the wheel against an obstacle, as wheel damage may result.

CAUTION:

- * Do not run the engine at high rpm with the transmission in neutral or the clutch lever pulled in. Serious engine damage may result.

NOTE:

- * The battery will not charge while the engine speed is near idle speed. Avoid idling for prolonged periods, or continuous operation below: 1,500rpm
