

PARKING

1. After stopping the motorcycle, shift the transmission into neutral, turn the handlebar fully to the left, turn the ignition switch OFF and remove the key.
2. When parking, support the motorcycle on the side stand or centre stand.

Park the motorcycle on firm, level ground to prevent it from falling over.

If you must park on a slight incline, aim the front of the motorcycle uphill to reduce the possibility of rolling off the side stand or overturning.

3. Lock the steering to help prevent theft (page 47).

Make sure flammable materials such as dry grass or leaves do not come in contact with the exhaust system when parking your motorcycle.
