

## Removal

## Installation

- (1) Fuse holder
- (2) Spare fuse

- (3) Old fuse
- (4) Clips

If you do not have a replacement fuse with the proper rating for the circuit, install one with a lower rating.

### NOTICE

Replacing a fuse with one that has a higher rating greatly increases the chances of damaging the electrical system.

If the replacement fuse of the same rating burns out in a short time, there is probably a serious electrical problem on your motorcycle.

Leave the blown fuse in that circuit and have your motorcycle checked by your Honda dealer.
