

## STARTING THE ENGINE

### **▲ WARNING**

- \* **Never run the engine in a closed area. The exhaust contains poisonous carbon monoxide gas that can cause loss of consciousness and may lead to death.**
- \* **Attempting to start the engine with the transmission in gear and the clutch engaged may result in injury or damage.**

### **Preparation**

1. Make sure the transmission is in neutral and the fuel cock is ON.
2. Insert the key in the ignition switch and turn to ON. The neutral indicator (green) should go on.
3. Make sure the engine stop switch is in RUN.
4. (UY, UB, NZ) Retract the right side stand.

## **Starting Procedure**

### Cold engine

1. Raise the choke lever (1) to Fully Closed (A).
2. Open the throttle slightly and operate the kickstarter with the right foot, starting from the top of the stroke and following through to the bottom with a rapid and continuous kick.

### **CAUTION:**

- \* **Do not allow the kickstarter to snap back freely against the pedal stop as engine case damage could result.**

(1) Choke lever

(A) Fully Closed

(B) Fully open
