

Appearance Care

Finishing Touches

Refer to *Safety Precautions* on page 69.

After washing your Honda MUV, consider using a commercially available spray cleaner/polish or quality liquid or paste wax to finish the job. Use only a non-abrasive polish or wax made specifically for motorcycles or automobiles. Apply the polish or wax according to the instructions on the container.

If a surface on your Honda MUV is chipped or scratched, your Honda dealer has touch-up paint to match your Honda MUV's color. Be sure to use your Honda MUV's color code (page 187) when you buy touch-up paint.

If the frame has a chip that exposes the metal, first apply primer (to prevent corrosion) and then apply the touch-up paint. Several thin layers of touch-up paint are better than one thick coat.
