

When the Honda Smart Card Key System Does Not Work Properly

When the Honda smart card key system does not work properly, perform the following:

Honda Smart Card Key System is OFF:

Turn the Honda smart card key system ON. See page 57 for switching the Honda smart card key system.

When turning the ignition switch to ON, the Honda smart card key indicator flashes five times:

Replace the battery. See page 73 for replacing battery.

Used in an area surrounded by strong radio waves or noise:

There may be an interruption of operating. The Honda smart card key system uses low-intensity radio waves. The Honda smart card key system may not work properly in the following environments:

- There is strong electrical current nearby.
- You carry a cell phone, a laptop computer, or other electrical device.
- The card key is touching or covered by metal.
