

Loading and Operational Guidelines

Carrying cargo will affect how your FOURTRAX handles and greatly reduce its ability in accelerating, braking and making turns and other maneuvers.

Be sure to observe the weight limits and follow these guidelines:

1. Do not place cargo anywhere on the FOURTRAX other than in the rear trunk. Otherwise, operating stability may be adversely affected.
2. Never ride with a passenger.
3. Do not tow another vehicle.
4. Make sure all cargo is secured and the rear trunk lid is closed before riding.
