

## TYRES

This BIG RED is equipped with low pressure tubeless tyres to promote comfortable riding.

Although the tyres are designed specifically for vigorous off road use, they are not immune to punctures. Always select your riding area with care.

### ⚠ WARNING

\* *The BIG RED is not designed to be driven on paved surfaces. Handling and control will be severely affected.*

Check the tyre pressure frequently with the air pressure gauge supplied with the BIG RED.

For normal use, the tyres should be inflated to the recommended pressure. A manually operated tire pump should be used rather than the high pressure systems found in service stations. This will minimize the possibility of tire damage from overinflation.

### NOTE:

\* Tyre pressure should be checked when the tyres are “cold,” before you ride.

### ⚠ WARNING

- \* *Maintain proper tyre air pressure. Improperly inflated tyres may adversely affect maneuverability and may cause loss of control.*
- \* *When replacing tyres, use only the size, type and brand identified in the chart. The use of different sizes or types of tyres can severely effect vehicle handling.*
