

Gauges, Indicators & Displays

Speedometer

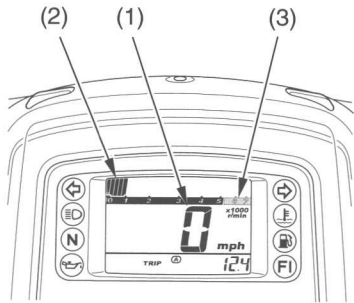

The speedometer (1) shows riding speed in miles or kilometers per hour.

Tachometer

The tachometer (2) shows engine speed in revolutions per minute (rpm).

The tachometer red zone (3) shows excessive engine rpm range (indicated from the beginning of the tachometer red zone) in which operation may damage the engine.

Do not let the tachometer rpm display enter the red zone.

- (1) speedometer
- (2) tachometer
- (3) tachometer red zone
