

Engine Oil

Add Engine Oil:

If the oil filter was replaced:

1.9 US qt (1.8 ℓ)

If the oil filter was not replaced, use approximately:

1.8 US qt (1.7 ℓ)

To fill the oil tank to the upper level, oil should be added in two steps.

15. Pour the recommended oil into the oil tank, up to the upper level mark.

16. Install the oil filler cap/dipstick securely.

17. Start the engine. Let it idle 5 minutes. During idling, support your motorcycle in an upright position on a firm, level surface to assure an accurate oil level reading.

18. Stop the engine. Remove the oil filler cap/dipstick.

19. Add the recommended oil up to the upper level mark. (Do not overfill.)

20. Reinstall the oil filler cap/dipstick.

21. Check for oil leaks.
