## **Appearance Care**

 We recommend the use of a garden hose to wash your motorcycle. High pressure washers (like those at coin-operated car washes) can damage certain parts of your motorcycle. If you use a high pressure washer, avoid spraying the following areas:

wheel hubs muffler outlet area under seat engine stop switch under fuel tank drive chain carburetor

## **NOTICE**

High pressure water (or air) can damage certain parts of your motorcycle.

## Washing Your Motorcycle with a Mild Detergent

- 1. Rinse your motorcycle thoroughly with cool water to remove loose dirt.
- 2. Fill a bucket with cool water. Mix in a mild, neutral detergent, such as dish washing liquid or a product made especially for washing motorcycles or automobiles.
- 3. Wash your motorcycle with a sponge or a soft towel. As you wash, check for heavy grime. If necessary, use a mild cleaner/degreaser to remove the grime.
- 4. After washing, rinse your motorcycle thoroughly with plenty of clean water to remove any residue.
- 5. Dry your motorcycle with a chamois or a soft towel.
