

Regular inspections

Motorcycles must undergo 3 regular inspections - 6 and 12 monthly inspections, and a one month (or after 1000km) inspection.

There are also other items that should be checked as recommended by HONDA.

Carry out all these inspections for the safety of the motorcycle and the rider.

It is the owner's responsibility to carry out these inspections. It is also the owner's responsibility to take the motorcycle to a workshop if inspections cannot be carried out by the owner.

- Consult your nearest AUTHORISED HONDA dealer if these inspections cannot be carried out by yourself.

- Carry out inspections within your range of knowledge and ability. Consult the nearest AUTHORISED HONDA dealer if the inspection process is too difficult for you.

Inspection results should be recorded into the "Maintenance notebook" for reference, and should be stored separately away from the motorcycle.

Refer to page 88 for service data on inspection/maintenance figures.

The inspection items for 6 monthly inspections are shown on the following page.
