

The recommended tires for your motorcycle are:

front	BRIDGESTONE G709 RADIAL	130/70R18M/C 63H
rear	BRIDGESTONE G704 RADIAL	180/60R16M/C 74H
type	radial, tubeless	

Whenever you replace a tire, remember:

- Have the wheel balanced after the tire is installed.
- Have the tire replaced by your dealer.

Important Safety Reminders

- Do not install a tube inside a tubeless tire on this motorcycle. Excessive heat build-up can cause the tube to burst.
- Use only tubeless tires on this motorcycle. The rims are designed for tubeless tires, and during hard acceleration or braking, a tube-type tire could slip on the rim and cause the tire to rapidly deflate.
- Do not install car tires on this motorcycle. During installation the tire may separate from the rim with enough force to cause serious injury or death.
- When replacing tires, use only the recommended tires as shown above and on the tire information label. Use of other tires on the model equipped with ABS may impair proper ABS function. The ABS computer works by comparing wheel speed.
Non-recommended tires can affect wheel speed and may confuse the ABS computer.
- If you ever replace a wheel, make sure that the wheel's specifications match those of the original wheels.
Be sure you use only TPMS-specific wheels. Not using TPMS-specific wheels can cause an air leak, a tire pressure monitoring system failure, or both.
Replacement wheels are available at your dealer.
