

Starting the Engine *(Continued)*

- 4 Pull the choke lever up all the way to fully on.
- 5 **Using the start button**
With the throttle 1/8 to 1/4 open, press the start button.
Using the kickstarter
Lightly depress the kickstarter until resistance is felt. Then let kickstarter return to the top of its stroke.
With the throttle 1/8 to 1/4 open, operate the kickstarter. Kick from the top of the stroke through to the bottom with a rapid, continuous motion.
- 6 Immediately after the engine starts, push the choke lever down to the halfway position.
- 7 Warm up the engine by opening and closing the throttle slightly.
- 8 Continue warming up the engine until it runs smoothly and responds to the throttle, when the choke lever is at fully OFF.

Warm Engine:

- 1 Do not use the choke.
- 2 Start the engine following step 1-3 and 5 under "Cold Engine".

If the engine does not start:

- 1 Turn off the ignition switch.
- 2 Push the choke lever down all the way to fully off.
- 3 Open the throttle fully.
- 4 Crank the engine several times with the kickstarter.
- 5 Follow steps 1-2 under "Warm Engine".
